Portable

Briefcase Design

4-Head Hi-Fi VCR

15" Flat LCD Monitor

"Portability, quality and a compact design - the Elite-V delivers the finest detail from a VCR-based inspection system"

Ratech Electronics delivers Hi-Detail, Hi-Quality and Slim Design in the Elite video inspection system. It features a large color 15" TFT Active Matrix LCD monitor plus a built in 4-Head VCR in a compact briefcase style setup.

When the Elite is closed up, carrying is easy due to its slim design so that in travel, the components are protected from the elements and potential hazards.

When open and in operation, the control unit has been designed with its operating functions top and front

mounted making it easy to operate and monitor. Also included on the panel, is a camera test terminal for convenient analysis of any problems. The inclusion of this test terminal allows you to test the camera without the cable reel attached.

The 4-Head Hi-Fi VCR built into the front of the unit allows recording of the inspection. Along with the inspection video, an on-screen overlay display with count, time & date and eight (8) pages of memory for listing details of problems and / or company information is available to use.

COLOR INSPECTION CAMERA
