## INSPECTOR PC<sup>®</sup>

Color

**Self Leveling Camera**

**Laptop Computer**

**Record Digitally**

**Compact**

**Lightweight**

*"The most advanced, portable, self contained video inspection system today."*

Ratech's Inspector PC is the most advanced inspection system on the market today. This digital system features a state-of-the-art laptop computer retrofit into the camera control unit.

The laptop is used to view and record your inspection in digital format (AVI) as well as take digital stills of major defect or observations (JPG).

Once completed, the recorded inspection can be 'burned' onto CD-ROM or DVD within minutes and then be given to your client immediately. As well, a detailed report of the inspection is also

produced with your choice of printing and/or placing it on the CD or DVD.

The laptop is removable so that it can be brought into the office/home. This allows you to use it for other applications such as internet, word processing, accounting, email...etc.

The control unit is built with Ratech's standard easy-to-access front mounted operating functions. Among these controls is a camera test terminal allowing you to test the camera *without* the cable reel.

### COLOR INSPECTION CAMERA - SELF LEVELING

- Self-Leveling (picture is always upright)
- Compact camera design (1.375"D x 2.312"L)
- 512 Hz In-Line Transmitter
- Rugged shock and water resistant camera module
- Highly sensitive CCD Technology
- High Intensity LED lighting with polycarbonate cover
- Scratch resistant, high impact sapphire viewing lens
- Durable stainless steel housing

### LAPTOP / CONTROL UNIT

- Color 15" XGA LCD Screen
- Intel Pentium 4 with 256 meg RAM
- CD-RW/DVD-ROM, 20 gig HDD, 3.5 FDD, 3 USB, 1 FireWire, NIC, 56k modem
- Windows XP
- Fully editable on-screen overlay via Inspector PC software
- TV and VGA out features
- CD-Burning software
- Condenser microphone
- Lights: variable intensity
- Camera test socket
- Camera Input Terminal
- Hard cover carrying case folds to briefcase style
- Power: 110-130 VAC, 60 Hz

### PUSH CABLE

- Combination push rod-video cable, 0.475"D with low friction polypropylene jacket
- Water-proof, dual jacket Gel Rod cable
- 200 feet (60 meters) standard length included (lengths up to 400' available)

### COILER

- Overall size: 32"H x 14"W x 27"D
- Slip-ring:sealed, continuous contact, maintenance free
- Weight: 45 lbs (w/ 200 ft. of cable) - Balance optimized
- Tough, durable powder coat paint finish
