

## Loading Ramp & Winch Part # LR001

### Loading Ramp with Winch

Tired of straining your back lifting and lugging your drain cleaning machine on and off your van on every job? Switch to the **newly re-designed** loading ramp and winch system and see how easy it is to eliminate dangerous stress on your back, cut down on costly workers' compensation claims, and add years of life to your equipment.

### Remote Switch

Our **new and improved** remote switch makes loading and unloading much safer and makes the ramp and winch system OSHA compliant for accessibility. All winches will now have hand held remotes with a 12 foot cord instead of the switch on the frame.

### Rollers

Ramp and extension rollers have been repositioned to give more support to the machine during loading and unloading for less strain on the machine frame. With other models, your machine's frame literally bends as it drops down to the ramp extension and then to the ground. With Duracable's ramp, your machine is gently unloaded with little strain on the frame.

Rollers are now replaceable, saving you time and money on repairs and making your ramp last longer.

### Frame

Both the ramp and extension have crossbars added in the frame to create a more stable unit. A pin with lanyard is included to keep the ramp extension in the retracted position when not in use.

### Cable Clearance

The mount plate for the winch is now pitched at the same angle as the ramp, leading to better cable clearance as the cable unwinds and rewinds.

### EZ-Stor Shelf

The EZ-Stor Shelf bolts directly onto the loading ramp frame with just four bolts and provides storage for all the extra equipment you need for a job.

Pictured above is the pulling winch for the loading ramp.

### Ramp Specifications (specs are approximates)

#### Length

Ramp with or without EZ-Stor Shelf ..... 51-3/8"

#### Width

Ramp with or without EZ-Stor Shelf ..... 26-1/4"

#### Height

Ramp with EZ-Stor Shelf ..... 36-1/2"

Ramp without EZ-Stor Shelf ..... 10"

#### Weight

Ramp without Winch..... 85 lbs.

Ramp with Winch..... 100 lbs.

EZ-Stor Shelf ..... 36 lbs.
