MODEL PV-1200
“Power-Vac”
Product Information Sheet

Shown here is the PV-1200 with optional 3,000 psi Water Jet with 200 gallon tank & rear mtd. hose reel.

Unit is mounted on a custom 18,000 lb. GVW triple axle trailer.

Unit shown here has std. 25 HP / 525 CFM drive system. HO & DHO 37 HP drive also available.

Excellent for boring fluid recovery the PV-1200 holds 6 cu. yds. of solid or liquid material. Water jet system is useful in both dig assistance and cleanup.

Standard features on this unit include:

- 2-part “hi-buildup” epoxy finish on tank and skid.
- “Centri-clean” air flow and filtration system for maximum use between service to filter.
- Internal tank water washdown system in debris tank.
- Quiet drive system with remote acoustical / baffled silencer.
- Skid built unit assembly to allow remounting as one-piece unit.
- Hose storage rack on tank and easy access filter location for operator ease.
- Custom trailer with “V” tail cutout for cleaner dumping

Other optional accessories available include:

High Output gas or diesel drive, large hatch with lift system, 2,000 or 3,000 psi water jet, air compressor and air knife system, hose boom w/ storage rest, solar battery charging system, and Hydraulic Tool Circuit for operating breakers, tampers, and other hyd. tools.
