EZ-Lock™ Kit

Duracable's® new EZ-Lock™ tools along with your drill, make installing end fittings on any size and type of cable a snap. With the EZ-Lock™ system there is no more wasted time or energy and no fumbling with pliers.

- 1) Anchor cable in a vise with at least 1" extended.
- 2) Center punch the end of the cable to spread the first ring so that the threads catch more easily.
- 3) Put the appropriate size EZ-Lock™ tool in your drill.
- 4) Put the end fitting into the EZ-Lock™ tool.
- 5) Apply Loctite® primer then retaining compound.
- 6) Power the end fitting into the cable. Within seconds your end fitting is installed.

The EZ-Lock™ kit includes Loctite® primer, Loctite® retaining compound, and four EZ-Lock™ tools including:

- 1) Large Tool for installing male and female end fittings in 11/16" and 3/4" cables;
- 2) Medium Tool for installing male end fittings in 1/2" and 5/8" cables;
- 3) Small Tool for installing male end fittings in 3/8" and 5/16" cables; and
- 4) Slip Joint Tool with unique outer spring-loaded guide that ensures the slip joint cannot slip off during installation.

Loctite®

Use Loctite® when you install end fittings and splice cores to help prevent slippage.
