

Reel Shield Part # RS2

Reel Shield

One of the most important parts of any service call is the cleanup after the job is completed. The Reel Shield helps keep the mess to a minimum when you are using an open reel. By placing the Reel Shield cover over the reel, you control any splatter, which makes cleanup easier.

Reel Shield Specifications *(specs are approximates)*

<i>Depth</i>	
Reel Shield	14-1/2"
<i>Width</i>	
Reel Shield	31"
<i>Height</i>	
Reel Shield	31"
<i>Weight</i>	
Reel Shield	7 lbs.

Reel Easy Part # RE2

Reel Easy

Use the Reel Easy to make loading cable into reels a snap. Getting cable from the box to the reels has never been easier. Just place the cable box on the Reel Easy and feed it into the reel. The Reel Easy has eight legs. The bottom four legs have rubber feet that keep the Reel Easy stationary. The top four legs are used like a turntable, allowing cable to flow easily from the carton into the reel. With two Reel Easy's, you can pre-load reels not mounted on the machine for easy, quick change overs in the field.
