

This electric jetter is the alternative choice to our gas powered models. Simply built, this unit will perform well with limited maintenance and care.

Gorlitz Model GO1500 was designed with portability in mind. The frame is constructed with a retractable handle, which locks in the up and down position for easy transportation or storage. Equipped with a custom built dual capacitor 2 HP motor, this jetter will draw 19.8 amps at full load. The duplex ceramic plunger pump equipped with pulsation will generate over 1500 psi at 2.1 GPM. This model is supplied with two hose sizes on a removable split reel, giving the operator the capability to clear sludge, grease, residues and open frozen lines from 1 1/2" to 4" in diameter.

### ACCESSORIES

50' Trap Hose	100' Jetter Hose
Pulsation	Nozzle Assortment
Hose Guard	Nozzle Cleaning Kit
Mesh Filter	Pressure Regulator
Allen Wrench	Adjustable Reel Brake
Tool Box	Hose Shutoff Valve
